

Vacuum Anti-Telescoping Attachment

An optional vacuum operated anti-telescoping device is available for all Tip Lift models. This attachment prevents most non-porous materials from telescoping away from the core. The vacuum plate is custom built to fit the customer's roll. The plate is fabricated from Lexan and includes neoprene seals around the probe and the outside edge of the plate. The attachment is available with electric or pneumatic vacuum generators. A single maintained pushbutton on the Tip Lift handle controls the attachment.

dB(A) rating on electric package 98-100
dB(A) rating on air vacuum package 60-65
